

Design Your Garden

Imagine that you are going to plant a pollinator garden. What would you like to include to keep your pollinator friends healthy and happy?

Draw your garden below.

- What type of flowers will you plant for their food?
- What color will they be?
- What type of spaces will you provide for them to live?
- Will they be in the sun or shade?
- Where will they hide when they need shelter?
- Will this keep them safe from predators?
- Where will they find water to drink?
- Will you put out dishes of water? Have a pond?
